JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

collection of Illinois fossils available. The collection, which represents a value of several thousand dollars and was given to the university without any conditions or reservations, will be housed in the Walker Museum of the university.

THE Liquid Carbonic Division of the Compressed Gas Manufacturers' Association announces the establishment of an industrial fellowship in the Mellon Institute of Industrial Research of the University of Pittsburgh, for the purpose of classifying, studying and developing the uses for liquid carbon dioxide. The founding of this fellowship is in accord with the desire of the members of the association to cooperate with users and prospective users of liquid carbon dioxide, with the object of developing efficient means of applying the gas and of obtaining fundamental data bearing on its use in various industries. In addition to conducting research work, the fellowship will be made a clearing-house of information regarding various uses of liquid carbon dioxide, and data will be kept on file for the accommodation of prospective users of this product. The present incumbent of the fellowship is Charles L. Jones, who will be glad to correspond with any one interested in the use of liquid carbon dioxide in industry.

UNIVERSITY AND EDUCATIONAL NOTES

SIR WILLIAM DUNN'S trustees have provided the sum of £100,000 for the establishment of a school of pathology at Oxford. They have also endowed with £10,000 a readership in biochemistry at Cambridge.

THE French government has offered a number of scholarships to Canadian universities, including the universities of Toronto, McGill, Laval and Ottawa. The winner of a scholarship will spend the next academic year in France. The scholarship has a value of 6,000 francs, with an additional 1,000 francs for traveling expenses.

DR. ALBERT SALATHE, of the College of Pharmacy at Albany, has been appointed head of the department of chemistry of Sweet Briar College, and Dr. Frederick William Stacy, formerly of the Florida State College for Women, has been appointed head of the department of psychology.

A COURSE of lectures on "Animal Psychology" will be delivered at Harvard University during the second half of the current college year by Dr. Wallace Craig, formerly professor of philosophy at the University of Maine.

M. AUGER has been appointed director of the laboratory of analytical chemistry at the University of Paris, to succeed the late M. Ouvrard.

PROFESSOR MAX BODENSTEIN has been invited to succeed Professor Nernst as head of the Physical-Chemical Institute of the University of Berlin.

DISCUSSION AND CORRESPONDENCE

GLACIATION IN THE CORDILLERAN REGION¹

TO THE EDITOR OF SCIENCE: Communications on the above subject by Thomas Large and Frank Leverett have appeared, respectively, in the September 22 and October 6 issues of SCIENCE. To these the writer wishes to add that during May and June, 1922, he found glacial drift including till with striated stones similar to that mentioned by Leverett at many other places on the Columbia Plateau west and southwest of Spokane. The writer expects to study the region further and to publish the results later on, but the information now at hand is sufficient to warrant the statement that
